

Tek-Dry Systems Ltd

'Your Process Partner'

French Fry Dryers

Drying equipment from Tek-Dry Systems is designed to produce top quality French fries and slivers & nubbins. High evaporation rates and close control of moisture profile are important features of these unique dryers.

TWO 25T/HOUR OUTPUT ST. STEEL FRENCH FRY DRYERS

SINGLE PASS DESIGNS

As a consequence of our HSS principle Tek-Dry can offer smaller footprint dryers.

With simplicity of design and robust construction some of the main benefits are :

- Ease of cleaning.
- High moisture removal /m² of dryer.
- Very little maintenance.
- Exceptional internal access.
- Minimum number of moving parts.

Excellence by Design

18T PER HOUR OUTPUT STAINLESS STEEL FRENCH FRY DRYER

KEY POINTS

- H.A.C.C.P Audit compliant.
- Hermetically sealed panels & doors.
- Lower operating temperatures: greater efficiency.
- Small footprint.
- All Stainless steel construction or combination steels available.
- Uniform moisture control.
- Improved product quality.

HUMIDI^TTEK

Automatic control of exhaust volume relative to the current process level.

- Minimise wasted energy.
- Improve process conditions.
- Better quality product.
- Lower running costs.

CLEAN INTERNALS

The photograph opposite shows the internal view of a typical Tek-Dry machine.

- Sloping floor for drainage.
- Wash down pipes, integral with frame.
- No food traps.
- No Baffles
- Easy clean design reduces downtime.

TYPICAL CLEAN INTERNAL DESIGN
